

In November 2013, Potomac Health Foundation awarded continuation grants to 11 projects from 10 agencies for a total amount of \$1,494,231. A project description summary for each is shown in the table below.

Agency Logo	Program Description	Target Beneficiaries	Grant Award
	<p>Action in Community Through Service ACTS Medical Caregivers Training Program This program seeks to avoid this deterioration by providing 4 comprehensive Nurse Aide training to passionate and motivated low-income residents of the county. This program serves two target groups by matching the needs of low-income residents for job training with the need for quality healthcare workers by aging adults. The efforts of these well-trained individuals will lead to greater independence of patients and better quality of life.</p>	Enrollment of 40 students, anticipating that they will achieve their BLS/CPR certification. Minimum of 320 hours of classroom education and minimum of 160 hours of clinical experience.	\$138,700.00
	<p>Action in Community Through Service ACTS Helpline Assistance and Outreach Project ACTS Helpline will continue to meet the community demand of those individuals in personal crisis including suicidal ideation by maintaining the 24/7 hotline. Outreach service to the elderly and disabled will continue and efforts will be made to expand outreach. The LOSS (Local Outreach to Suicide Survivors) will provide on-site support and aftercare those individuals in our community impacted by the death of a loved one to suicide.</p>	Continue to provide service to those families bereaved by suicide via the LOSS team. To expand outreach to serve those families who did not have contact with the LOSS team, but were referred to Helpline by Prince William County police.	\$132,650.00
	<p>Brain Injury Services Brain Injury Services BIS uses innovative therapies and supports to empower individuals to participate in daily activities as independently as possible. Individuals with brain injuries sometimes find it challenging to manage their emotions and behaviors. The treatment team helps participants learn practical and effective self-management strategies, as well as multiple approaches including cognitive behavioral therapy, applied behavioral analysis and techniques used for stress reduction.</p>	Continue to work with 25 individual, new and continuing clients having neurobehavioral issues that prevent daily functioning in the community.	\$195,989.00
